Sharing our Values

This fall Electrify America's ongoing focus on sustainability, equity and diversity, community engagement and facilitating electric transportation have spurred new collaborations, investments, accomplishments and learnings. We're excited to share some of those recent efforts with you today, as we pave the way for a more electric future.

LACI by the Numbers

Advanced Prototyping Center (APC) Fellowship Program has engaged **38 Technical Bootcamp participants** from low- or moderate-income communities

Of which, **100% have earned an industry-recognized credential** and more than **50% have been placed in an internship**

Program has **significantly increased participant interest and familiarity with ZEVs** and hands on experience and adoption of zero emissions mobility

Building Connections and Creating an Inclusive Green Economy

Electrify America is proud to support the Los Angeles Cleantech Incubator (LACI), an innovative community organization doing impactful work to help recruit, educate and train the next wave of employees to support and service the fast-growing charging and electric vehicle industries. The graduates of their various cleantech startup programs will help power the future of electric vehicle and charging infrastructure growth for today and tomorrow.

"As the electric vehicle market grows along with availability of high-speed charging stations, it is important to provide consumers with the opportunity for test drives and information on incentives and EV charging to help educate consumers on electric vehicle ownership."

— MISTI MURPHEY, DIRECTOR OF MARKETING, COMMUNICATIONS & CSR, ELECTRIFY AMERICA

Celebrate National Drive Electric Week.

Celebrating the Benefits of ZEVs During National Drive Electric Week

For the third year in a row, Electrify America's brand-neutral campaign "Normal Now," sponsored Plug-in America's National Drive Electric Week programs, which set a record this year of 30 events around the country. These ride-and-drive programs help get prospective drivers behind the wheel of an EV and educate drivers about the benefits and incentives that can come with transitioning to an electric lifestyle.

Boost by the Numbers

More than **double current EV charging infrastructure** in the United States and Canada

With plans to have more than **1,800 fast charging stations** and **10,000 individual chargers** installed over the next four years

This expansion will increase the deployment of **150 and 350 kilowatt chargers** – the **fastest speed** available today

Electrify America Announces "Boost Plan" to Enhance More Accessible Charging

For the third year in a row, Electrify America's brand-neutral campaign "Normal Now," sponsored Plug-in America's National Drive Electric Week programs, which set a record this year of 30 events around the country. These ride-and-drive programs help get prospective drivers behind the wheel of an EV and educate drivers about the benefits and incentives that can come with transitioning to an electric lifestyle.

"We are proud to take part in the transportation electrification for our Community Based Organization partners, who dedicate their time to improve the life conditions of others."

— JOSE MARIN, COMMUNITY OUTREACH DIRECTOR, VALLEY CLEAN AIR NOW

Philanthropy Spotlight: Valley Clean Air Now eGolf Donations

Through its community collaborator Valley Clean Air Now, Electrify America donated more than 50 all-electric VW e-Golf vehicles to community groups, non-profits, small businesses, local agencies and others throughout California's Central Valley. These donations will help these organizations support their local communities more efficiently and sustainably.
